

## **ERBE ELEKTROMEDIZIN GMBH**

**Since 1851 – a strong and innovative group of companies.**

As a family-owned and operated business, Erbe develops, manufactures, and markets systems for professional use in various medical disciplines all over the world.

Since the company's foundation, Erbe has continuously reshaped and adapted its business to an ever-changing reality in several key disciplines such as gastroenterology, general surgery, gynecology, bronchoscopy, and urology. The portfolio comprises devices and instruments for electrosurgery, thermofusion, plasma surgery, cryosurgery, hydrosurgery, and imaging.

Over the last ten years, sales have increased by 75% with an 85% increase in employees to over 1700 colleagues worldwide. Today, the international group of companies with sales and service units, as well as supply and productions units and an international network of distributors, Erbe is represented in 110 countries around the world.

Approximately 260 employees work in research and development. The intensive collaboration with renowned physicians from medical universities and hospitals is the key to the success with which Erbe successfully furthers developments in medicine.
